

Monitor What Matters

NotiFIRE is an all-in-one monitoring solution that measures and reports automatic deployment of an attached FST, temperature, humidity and power status in your vacation home, rental properties, RV or anywhere you plug it in.

Who we Help:

NotiFIRE is being used by Homeowners, Property Managers, RV Owners, Server Room Operators and more.

Simple Setup:

NotiFIRE is easy to install so you can begin monitoring in a matter of minutes

Peace of Mind:

NotiFIRE is on the clock 24/7 365, ensuring your property and assets are protected 100% of the time. Take the question and worry out of monitoring your treasured property.

How It Works:

NotiFIRE can be plugged into any standard outlet and will begin monitoring the environment in a matter of minutes. Using its own built in LTE connection.

NotiFIRE automatically connects to the provider of your choice (Verizon or AT&T) to transmit data.

Easy and affordable subscription plans. No need for an existing phone line, Wi-Fi or Internet

NotiFIRE instantly sends out an alert notification by text, call, or email, in the event of automatic deployment of an attached FST, temperature and humidity reach critical levels, or power is lost.

Be aware of minor issues and take preventive action before it's too late!

Technical Specification

DIMENSIONS	5.2" x 2.0" x 1.2"
POWER INPUT	AC/DC power supply 5v at 2amp max
BATTERY TYPE	Internal Lithium-Ion rechargeable
BATTERY DURATION	36-48 hours when fully charged
OPERATING RANGE	Temperature: 0°F - 127°F Relative Humidity: 10 - 95%. non-condensing
NOTIFICATIONS	Text, Phone call, Email (up to 9 separate notifications can be set)
DATA UPLOAD INTERVAL	Historic data uploaded every 8 hours
COMMUNICATION TECHNOLOGY	Cellular - LTE MI
